

**Overview**

Pointek CLS300 (standard version) is an inverse frequency shift capacitance level and material detection switch with optional rod/cable choices and configurable output. CLS300 is ideal for detecting liquids, solids, slurries, foam, and interfaces in demanding conditions where high pressure and temperatures are present and has the ability to tune out buildup on the probe.

**Benefits**

- Active-Shield technology so measurement is unaffected by material buildup or nozzle interference in active shield section
- Performs in extremely abrasive conditions because of solid rod construction
- Three LED indicators for adjustment control, output status, and power
- High-temperature version up to 400 °C (752 °F)

**Application**

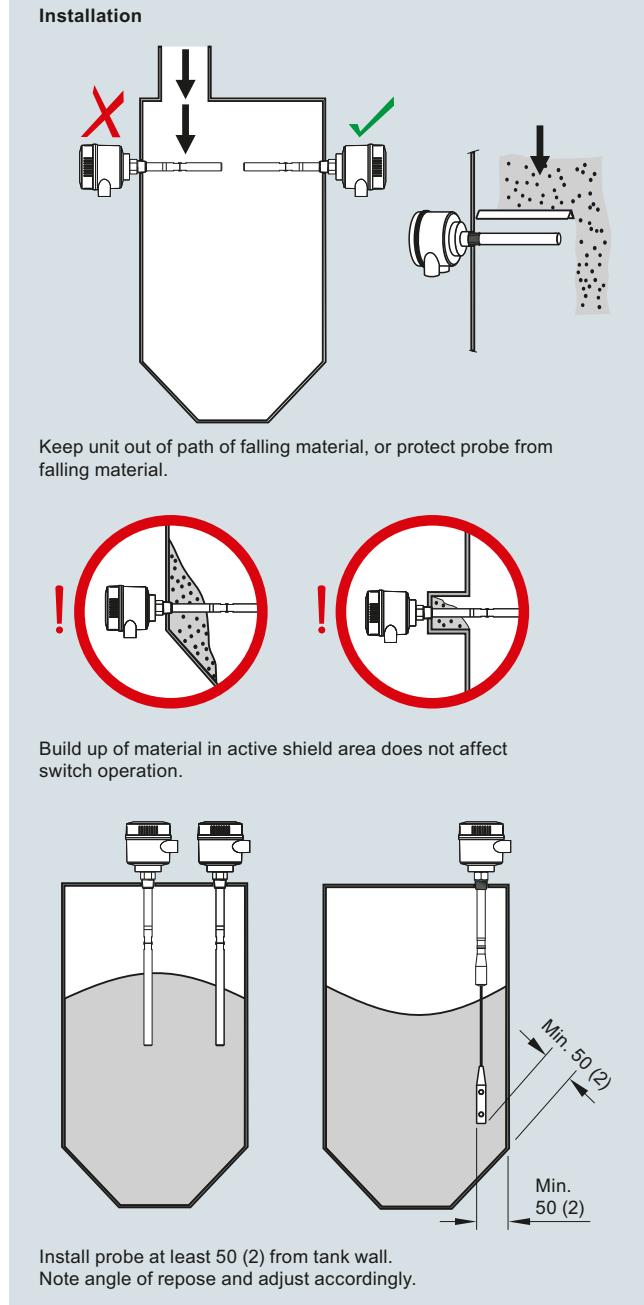

Pointek CLS300 standard version has three LED indicators with basic relay and solid-state switch alarms.

The robust design of CLS300 makes it specifically applicable for heavy solids applications where abrasive materials occur as in the mining industry. The fully potted electronics are unaffected by condensation, dust or vibration.

Wetted parts are made of stainless steel with a PFA shield for high chemical resistance, and of ceramic and stainless steel for high temperature version. Materials with low or high dielectric constants can be accurately detected. The unique Active Shield suppresses interference from material buildup or long installation nozzles.

The unique modular design of the Pointek CLS300 provides a wide range of configurations, process connections, extensions and approvals to meet the temperature and pressure requirements of specific applications. The modular design makes ordering easier and reduces stocking requirements. A wide range of probe configurations are available, including rod and cable versions.

- Key Applications: liquids, slurries, bulk solids, relatively high pressure and temperature, hazardous areas, milling and mining applications

**Configuration**

Pointek CLS300 installation, dimensions in mm (inch)

#### Technical specifications

<b>Mode of operation</b>		<b>Design</b>
Measuring principle	Inverse frequency shift capacitive level detection	Powder-coated aluminum with gasket
<b>Input</b>		<b>Material (enclosure)</b>
Measured variable	Change in picoFarad (pF)	Degree of Protection
<b>Output</b>		Cable inlet
Output signal	1 SPDT Form C relay	2 x M20 x 1.5 thread
• Relay output	• 30 V DC	(option: 2 x ½" NPT conduit entry
- Max. contact voltage	• 250 V AC	including 1 plugged entry)
- Max. contact current	• 5 A (DC)	
- Max. switching capacity	• 8 A (AC)	
- Time delay (ON and/or OFF)	• 150 W (DC)	
• Solid-state output	• 2 000 VA (AC)	
- Output	1 ... 60 s	
- Protection	Galvanically isolated	
- Max. switching voltage	Against reversed polarity (bipolar)	
- Max. load current	• 30 V (DC)	3 LEDs, for probe status,
- Voltage drop	• 30 V peak (AC)	output status and power supply
- Time delay (pre or post switching)	82 mA	2 potentiometers for time delay and
	< 1 V, typical at 50 mA	sensitivity
	1 ... 60 s	5 DIP switches for delay on/off, fail-
		safe high/low, time delay test/adjust,
		high/low sensitivity, test delay settings
<b>Accuracy</b>		<b>Power supply</b>
Resolution	1 % change in actual capacitance	Supply
• Min. sensitivity (pF)	0.2 % of actual capacitance value	12 ... 250 V AC/DC, 0 ... 60 Hz,
• Max. temperature error		galvanically isolated, 2 W
<b>Rated operating conditions<sup>1)</sup></b>		<b>Certificates and approvals</b>
Installation conditions	Indoor/outdoor	General Purpose
• Location		CSA, FM, CE, RCM

RF Capacitance switches

### Pointek CLS300 - Standard

#### Circuit diagrams

#### Notes:

- Identification label is on underside of lid. Switch and potentiometer settings are for illustration purposes only (refer to operation/setup in manual).
- All field wiring must have insulation suitable for at least 250 V.
- Relay contact terminals are for use with equipment having no accessible live parts and wiring having insulation suitable for at least 250 V.
- Maximum working voltage between adjacent relay contacts shall be 250 V.
- Refer to the Instruction manual or contact Siemens representative for detailed wiring information.

#### Wiring: Pointek CLS300 digital

#### Notes:

Refer to the instruction manual or contact a Siemens representative for detailed wiring information.

#### \*Magnet activated sensor test

A magnet can be used to test the sensor without opening the lid of the Pointek CLS300 digital version. Bring the magnet close to the test area indicated on the enclosure. The sensor test starts and finishes automatically after 10 seconds.

Pointek CLS300 connections

**Overview**

Pointek CLS300 (digital version) is an inverse frequency shift capacitance level and material detection switch with optional rod/cable choices and configurable output. It is ideal for detecting liquids, solids, slurries, foam, and interfaces in demanding conditions where high pressure and temperatures are present and has the ability to tune out buildup on the probe. The digital version includes PROFIBUS PA, an LCD display, and advanced diagnostic features.

**Benefits**

- Active-Shield technology so measurement is unaffected by material buildup or nozzle interference in active shield section
- Performs in extremely abrasive conditions because of solid rod construction
- Push-button calibration, full-function diagnostics
- High sensitivity allows installation in a wide range of liquids, solids or slurry applications
- Integral LCD display allows for easy menu-driven setup
- PROFIBUS PA communication (SIMATIC PDM compatible)

**Application**

Pointek CLS300 digital version provides an integral LCD display for stand-alone use, with PROFIBUS PA communication (Profile version 3.0, Class B) when required. Solid-state switch alarm is standard.

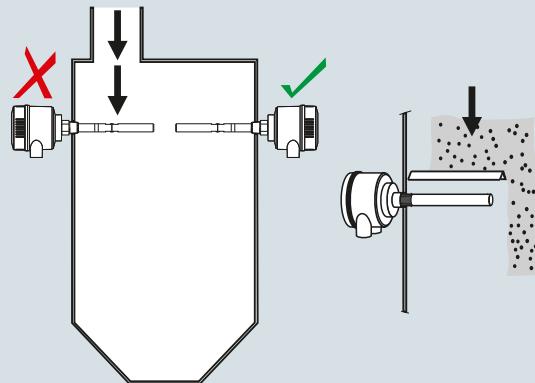

The robust design of CLS300 makes it specifically applicable for heavy solids applications where abrasive materials occur as in the mining industry.

The fully potted electronics are unaffected by condensation, dust or vibration.

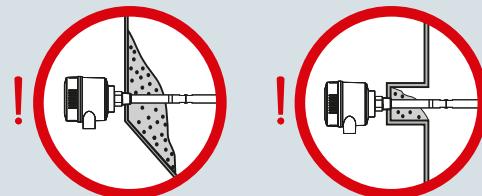

Wetted parts are made of stainless steel with a PFA shield for high chemical resistance, and of ceramic and stainless steel for high temperature version. Materials with low or high dielectric constants can be accurately detected. The unique Active Shield suppresses interference from material buildup or long installation nozzles.

The unique modular design of the Pointek CLS300 provides a wide range of configurations, process connections, extensions and approvals to meet the temperature and pressure requirements of specific applications. The modular design makes ordering easier and reduces stocking requirements. A wide range of probe configurations are available, including rod and cable versions.

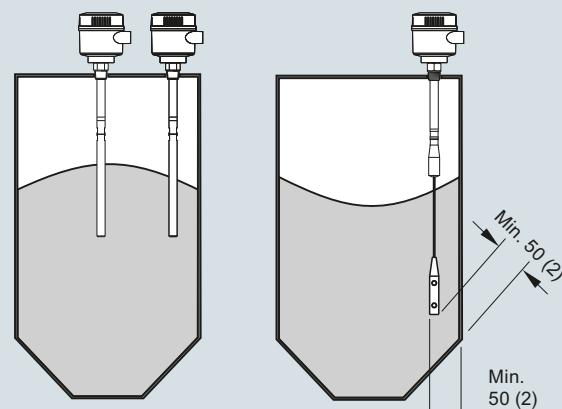

- Key Applications: liquids, slurries, bulk solids, relatively high pressure and temperature, hazardous areas, milling and mining applications

**Configuration****Installation**

Keep unit out of path of falling material, or protect probe from falling material.

Build up of material in active shield area does not affect switch operation.

Install probe at least 50 (2) from tank wall.  
Note angle of repose and adjust accordingly.

Pointek CLS300 installation, dimensions in mm (inch)

<b>Accessories</b>		<b>7ML1830-1JD</b>
1) Available only with Approvals options B and D.		
<b>Accessories</b>  One metallic cable gland M20 x 1.5, -40 ... +80 °C (-40 ... +176 °F) with integrated shield connection (available for PROFIBUS PA)		
<b>General Purpose</b>  ½" NPT General Purpose Cable Entry IP68/IP69K NEMA 6, -40 ... +80 °C (-40 ... +176 °F), Dust Ignition Proof, cable size 6 ... 12 mm (0.236 ... 0.472 inch)		
M20 x 1.5 General Purpose Cable Entry IP68/IP69K NEMA 6, -40 ... +80 °C (-40 ... +176 °F), Dust Ignition Proof, cable size 7 ... 12 mm (0.275 ... 0.472 inch)		
<b>Hazardous Locations</b>  ½" NPT EMC rated Cable Gland: Dust Ignition Proof, Flameproof Exd, and Increased Safety ATEX II 2 GD ExtD A21 (Zone 1, Zone 2, Zone 21, Zone 22, and in Gas Groups IIA, IIB and IIC) -60 ... +80 °C IP66, IP67, IP68, NEMA4X, cable sizes 5.5 ... 12 mm (0.216 ... 0.472 inch)		
M20 EMC rated Cable Gland: Dust Ignition Proof, Flameproof Exd, and Increased Safety ATEX II 2 GD ExtD A21 (Zone 1, Zone 2, Zone 21, Zone 22, and in Gas Groups IIA, IIB and IIC) -60 ... +80 °C IP66, IP67, IP68, NEMA4X, cable sizes 5.5 ... 12 mm (0.216 ... 0.472 inch)		
<b>Blind threaded flanges are available.</b> Customers interested in a custom designed device should consult a local sales person. For more information, please visit <a href="http://www.automation.siemens.com/aspa_app">http://www.automation.siemens.com/aspa_app</a> .

<b>CLS300 Weight Kit, 316L stainless steel</b> Kit, spare stainless steel weight. To be used in any cable version of CLS300.		<b>A5E01163727</b>

<sup>1)</sup> Special flange sizes and facings are available. Please consult a local sales person for details.

<sup>2)</sup> Please consult a local sales person for part number and pricing

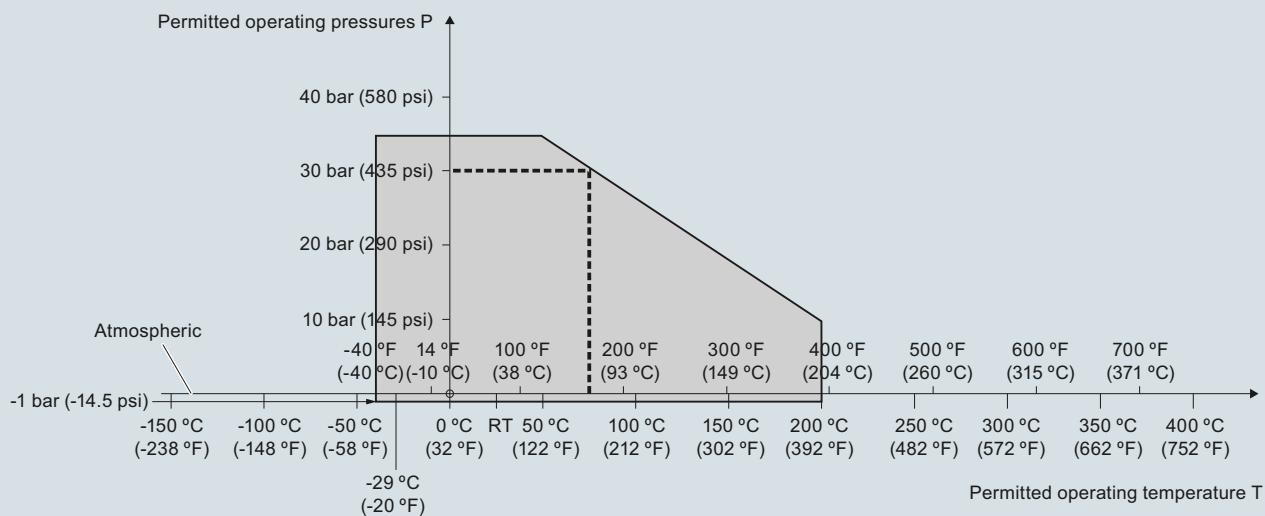

<sup>3)</sup> For General Purpose approvals only

<sup>4)</sup> To maintain approvals, qualified trained Siemens personnel required for part replacement

<sup>5)</sup> Customers interested in a custom designed device should consult a local sales person. For more information, please visit [http://www.automation.siemens.com/aspa\\_app](http://www.automation.siemens.com/aspa_app).

## Characteristic curves

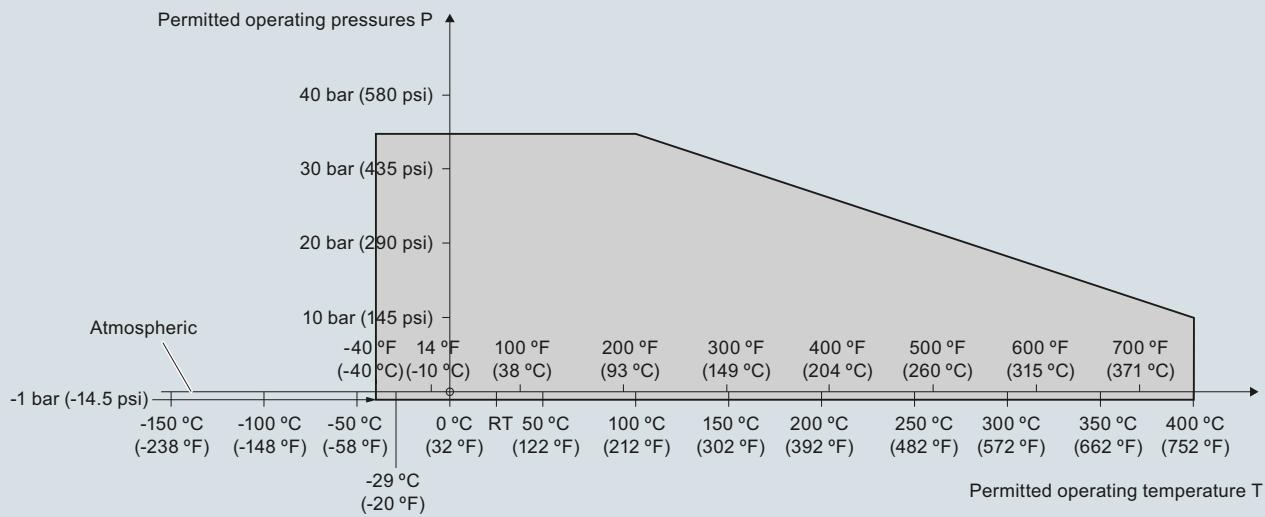

**Pressure/temperature curve**  
**CLS300 extended rod and cable probes**  
**Threaded process connections**  
 (7ML5650, 7ML5651, 7ML5660 and 7ML5661)

---- Example:  
 Permitted operating pressure = 30 bar (435 psi) at 75 °C

Pointek CLS300 process pressure/temperature derating curves (7ML5650, 7ML5651, 7ML5660 and 7ML5661)

**Pressure/temperature curve**  
**CLS300 high temperature rod probes**  
**Threaded process connections**  
 (7ML5652 and 7ML5662)

Pointek CLS300 process pressure/temperature derating curves (7ML5652 and 7ML5662)

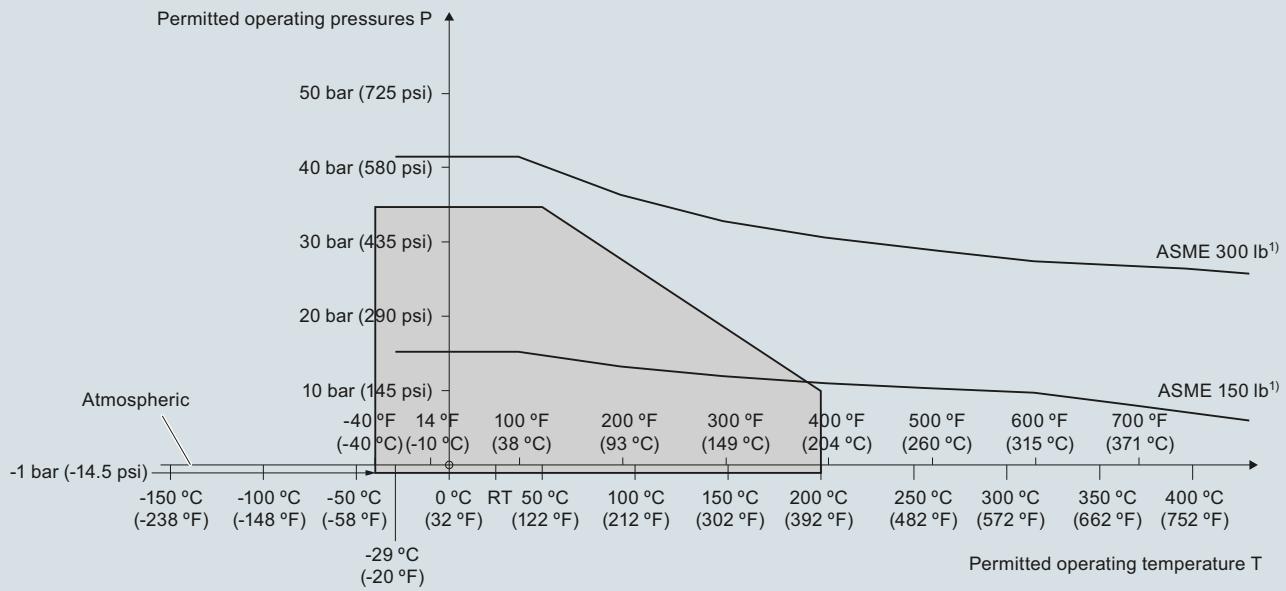

## Level measurement

Point level measurement  
RF Capacitance switches

### Pointek CLS300 - Digital

#### Characteristic curves (continued)

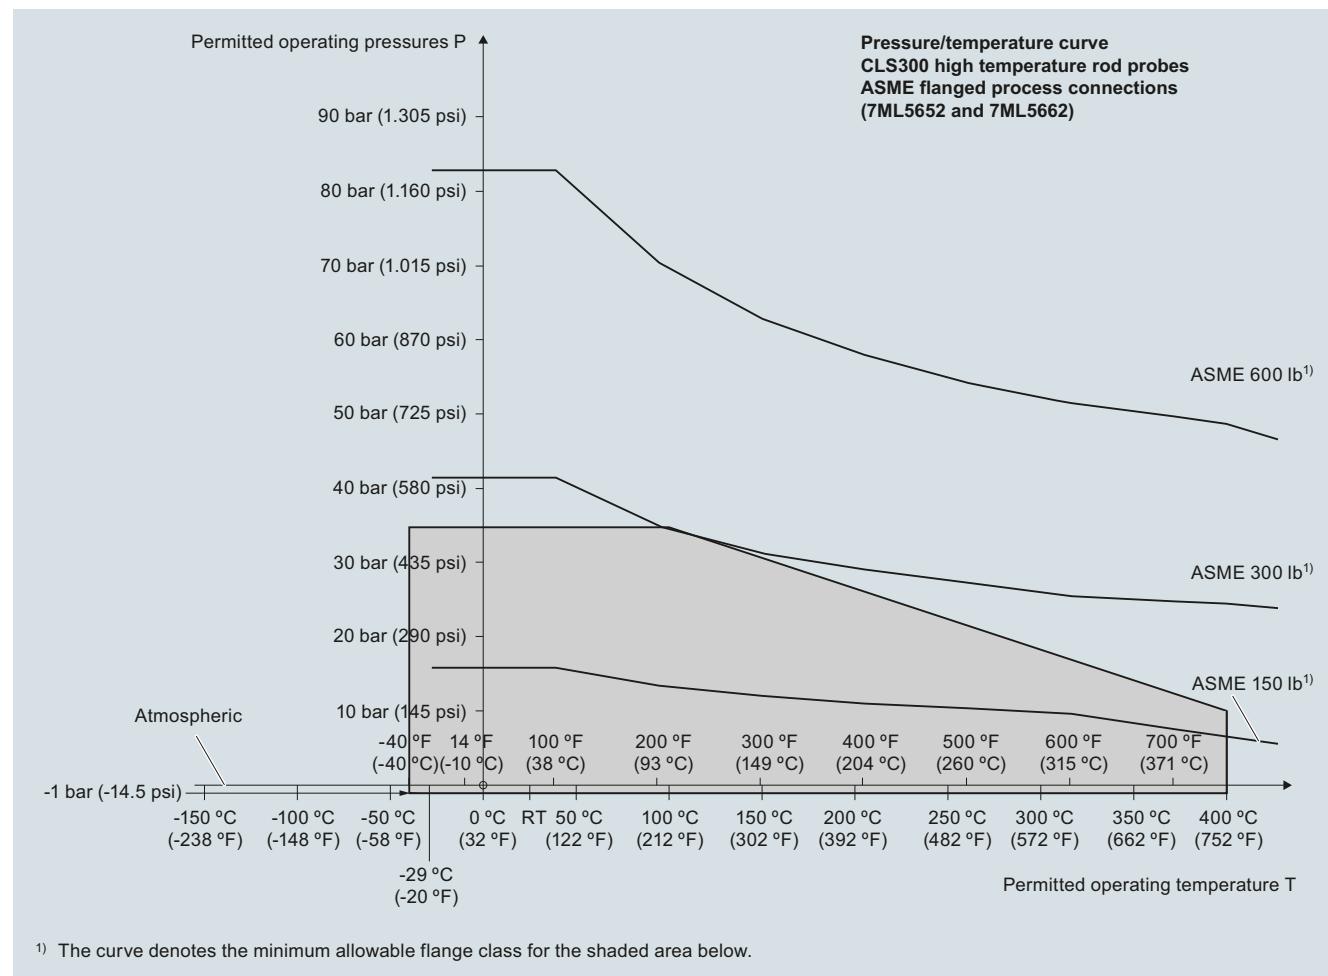

**Pressure/temperature curve**  
**CLS300 extended rod and cable probes**  
**ASME flanged process connections**  
(7ML5650, 7ML5651, 7ML5660 and 7ML5661)

<sup>1)</sup> The curve denotes the minimum allowable flange class for the shaded area below.

### Pointek CLS300 - Digital

#### Dimensional drawings (continued)

4

Flange Facing (raised face)	
Flange Class	Facing thickness
△ ASME 150/300	2 (0.08)
△ ASME 600/900	7 (0.28)
△ PN16/40	2 (0.08)

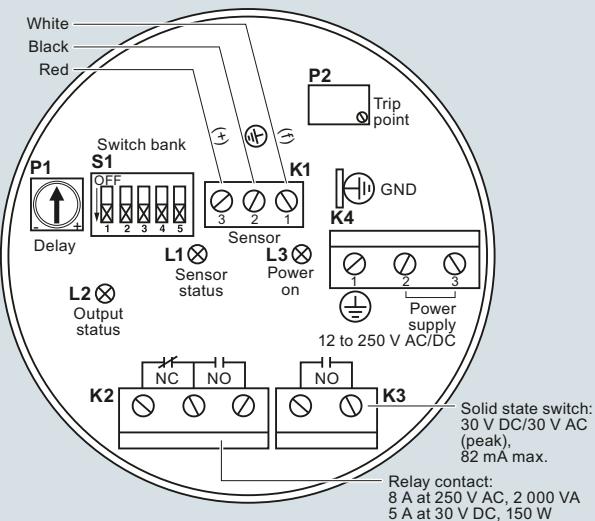

#### Note:

<sup>1)</sup> Extended Active Shield (Y02): standard length 105 (4.13). Optional active shield lengths: 230 (9.06) or 380 (14.96). Insertion length does not include any raised face/gasket face dimension (see Flange Facing Table above)

Pointek CLS300 flanged process connections, dimensions in mm (inch)

## Circuit diagrams

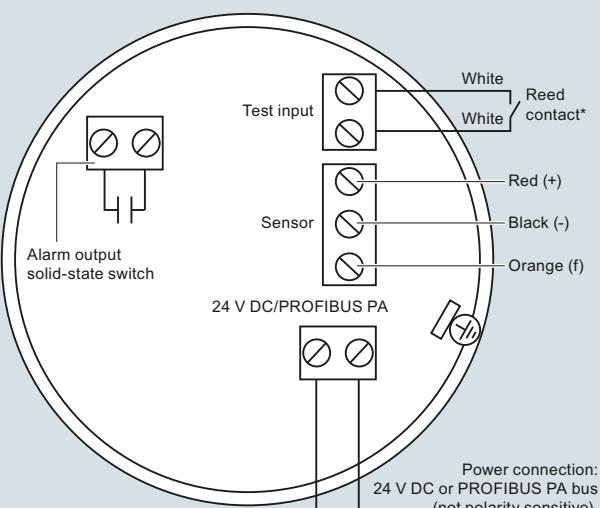

### Wiring: Pointek CLS300 standard

#### Notes:

- Identification label is on underside of lid. Switch and potentiometer settings are for illustration purposes only (refer to operation/setup in manual).
- All field wiring must have insulation suitable for at least 250 V.
- Relay contact terminals are for use with equipment having no accessible live parts and wiring having insulation suitable for at least 250 V.
- Maximum working voltage between adjacent relay contacts shall be 250 V.
- Refer to the Instruction manual or contact Siemens representative for detailed wiring information.

### Wiring: Pointek CLS300 digital

#### Notes:

Refer to the instruction manual or contact a Siemens representative for detailed wiring information.

#### \*Magnet activated sensor test

A magnet can be used to test the sensor without opening the lid of the Pointek CLS300 digital version. Bring the magnet close to the test area indicated on the enclosure. The sensor test starts and finishes automatically after 10 seconds.
